John C.R. Hildebrand
President
HLF Diversified Inc.
2934 Vandorf Sideroad
Stouffville, ON L4A 2J8

Dear Mr. Hildebrand:

The U.S. Environmental Protection Agency applauds HLF Diversified Inc. ("HLF") for your leadership in developing environmentally oriented deicing products. EPA's Safer Choice Program seeks to promote the use of products with improved environmental and human health characteristics. The product in our partnership – Firestorm Intense Ice Melter – fully achieves that objective in the industrial deicing sector.

The key purpose of the Safer Choice-HLF partnership is to recognize and encourage the environmentally preferable chemistry of this partnership product. Safer Choice is very enthusiastic about your successful formulation of this product and about our partnership. By replacing the traditional sodium chloride with a combination of salts and organic additives, you have demonstrated active environmental stewardship and dedication to continuous improvement.

Customers who use your Safer Choice product will be participants in this important national effort to protect the environment and safeguard human health. We commend HLF for your commitment to improving the environmental profile and performance of your product – and for leading change in the deicing industry. Safer Choice looks forward to building this partnership and wishes you much success with this partnership product.

Sincerely,

A handwritten signature in black ink, appearing to read "Clive Davies".

Clive Davies, Chief
Safer Choice Program
