WPS-DF
(FOR ANTENNA)

WPS-4A / WPS-4S
(FOR CONNECTORS)

TQ-114-F18
Torque wrench

RDCUTTER

1/2" JMA DM Connector

Step #1: Install WPS-4A or WPS-4S and 1/2" Connector

Slide the WPS-4A or WPS-4S onto the 1/2" cable 6-12 inches from the end prior to cable preparation.

Prep and install the 1/2" cable to install the UXP Compression connector. Refer to the 1/2" corrugated connector install instructions.

Compatible port dimensions

1

SURFACE SHOULD BE FREE OF FLATS, THREADS, OR RAISED LETTERING WHOSE CHARACTERS ARE TALLER THAN 1/8".

Step #2: Cut WPS-DF

Measure the WPS-DF from the end of the port to the beginning of the threads as shown. Use your thumb to mark a cut line.

Align the blade of the RDCUTTER to the thumb mark indicating the cut length. Using one firm cutting motion, cut the WPS-DF to the proper length.

Properly measured WPS-DF.

Step #3: Install WPS-DF

Place the cut WPS-DF onto the antenna or device female port.

Ensure that the WPS-DF is properly placed on the antenna or device port, positioned just past the threads.

Properly installed WPS-DF.

Step #4: Connect and Torque Interface

Connect the 1/2" connector to the antenna port or device, and hand tighten.

Torque the connection to 18 lbf-ft using the TQ-114-F8 torque wrench.

Properly mated connector.

Step #5: Install WPS-4A or WPS-4S

Slide the WPS-4A or WPS-4S over the 1/2" connection, making sure to overlap the port seal.

Completed installation of the Weather Protection System.
NOTE: all ribs of the port seal are fully covered by the WPS.

Proper Port Seal Alignment

Ribs be towards threads and should not overlap onto threads

Seal should clear any shoulder or step on port
